# 2 Safety and the environment

## 2.1. About this document

**Use**

> Please read this documentation through carefully and familiarize yourself with the product before putting it to use. Pay particular attention to the safety instructions and warning advice in order to prevent injuries and damage to the products.

> Keep this document to hand so that you can refer to it when necessary.

> Hand this documentation on to any subsequent users of the product.

**Symbols and writing standards**

| Representation | Explanation |
|---|---|
| ⚠ | Warning advice, risk level according to the signal word:<br>**Warning!** Serious physical injury may occur.<br>**Caution!** Slight physical injury or damage to the equipment may occur.<br>> Implement the specified precautionary measures. |
| ℹ | Note: Basic or further information. |

## 2.2. Ensure safety

> Do not operate the instrument if there are signs of damage at the housing, mains unit or feed lines.

> Do not perform contact measurements on non-insulated, live parts.

> Do not store the product together with solvents. Do not use any desiccants.

> Carry out only the maintenance and repair work on this instrument that is described in the documentation. Follow the prescribed steps exactly. Use only original spare parts from Testo.

> Dangers may also arise from the systems being measured or the measuring environment: Note the safety regulations valid in your area when performing the measurements.

### 2.2.1. Safety and the testo 510i/605i/915i

- Magnetic field
- May be harmful to those with pacemakers.

> Keep a minimum distance of 10 cm between pacemaker and instrument.

### 2.2.2. Safety and the testo 605i

- Not for condensing atmospheres. For continuous application in high humidity (> 80 %RH at ≤ 30 °C for > 12 h, > 60 %RH at > 30 °C for > 12 h), contact us
- The sensor must not be exposed to volatile chemicals such as solvents (e.g. ketene, ethanol, isopropyl alcohol, toluene) or organic compounds, especially in high concentrations and corresponding gases, over a prolonged period of time.

### 2.2.3. Safety and the testo 549i/552i

- Risk of injury due to pressurized, hot, cold or toxic refrigerants/media!

> Only to be used by qualified staff.

> Wear protective goggles and safety gloves.

> Before applying pressure to the measuring instrument: always fix the instrument tightly onto the pressure connection

> Comply with the permissible measuring range (0 to 60 bar). Pay particular attention to this in systems with R744 refrigerant, since these are frequently operated at higher pressures!

> Use with A2L refrigerants

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

Testo measuring instruments (as of July 2020) can be used in compliance with the prescribed laws, standards, directives and safety regulations for refrigeration systems and refrigerants as well as regulations of the manufacturers of refrigerants of safety group A2L as per ISO 817.

Regional standardization and interpretation must always be observed.

For example, DIN EN 378-Part 1-4 applies to the scope of the EN standards.

During maintenance work, the employer must ensure that a hazardous explosive atmosphere is prevented (see also TRBS1112, TRBS2152 VDMA 24020-3).

A hazardous and potentially explosive atmosphere must be anticipated during maintenance and repair work on refrigeration systems with flammable refrigerants (e.g. those of category A2L and A3).

Maintenance, repairs, removal of refrigerants and commissioning of systems may only be carried out by qualified personnel.

### 2.2.4. Safety and the testo 805i

- Laser radiation! Class 2 laser

> Do not look into the laser beam!

### 2.2.5. Safety and the testo 552i

- The testo 552i Smart Probe must not be connected if the pressure is higher than 5 bar. Otherwise, damage may occur.

## 2.3. Protecting the environment

> Dispose of faulty rechargeable batteries/spent batteries in accordance with the valid legal specifications.

> At the end of its useful life, send the product to the separate collection for electric and electronic devices (observe local regulations) or return the product to Testo for disposal.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 3 Specifications

Testo Smart Probes are different hand-held measuring instruments for various applications that communicate with your mobile terminal devices by means of an app. The respective Smart Probe performs the measurement and is operated by your mobile terminal device. The various Smart Probes allow you to measure the temperature, humidity, flow, and volume flow at the outlet, or perform pressure, differential pressure, and non-contact temperature measurements in the duct.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 4 Product description

## 4.1. Overview of Smart Probes

1 Measuring unit
2 LED
3 Key
4 Battery compartment (at the back)
5 Direction of flow testo 405i / testo 410i (not shown)
(An arrow on the top of the housing displays the direction of flow in which the measuring instrument has been calibrated and which achieves the best measurement results. Please note the direction of flow during usage.)

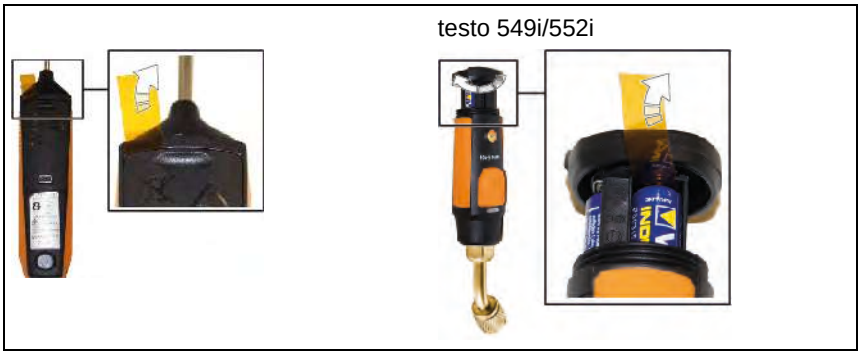
## 4.2. LED status

| LED status | Meaning |
|---|---|
| Flashing red | Low battery status |
| Flashing yellow | • Smart Probe is switched on.<br>• Smart Probe is searching for a BT connection, but is not connected. |
| Flashing green | • Smart Probe is switched on.<br>• Bluetooth is connected. |

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 5 First steps

## 5.1. Switching on/off



### 5.1.1. Switching on

1. Pull the film out of the battery compartment.
2. Press the button on your Smart Probe.
- The Smart Probe switches on.

### 5.1.2. Switching off

1. Press and hold the button on your Smart Probe.
- The Smart Probe switches off.

## 5.2. Establishing Bluetooth® connection

You need a tablet or smartphone with the Testo SMART App already installed on it to be able to establish a Bluetooth connection.

You can get the App for iOS instruments in the App Store or for Android instruments in the Play Store.

Compatibility:

- requires iOS 12.0 or later/Android 6.0 or later
- requires Bluetooth 4.2

✓ The Testo SMART App is installed on your terminal device and ready for use.

1. Press the button on the Smart Probe.
- The Smart Probe switches on.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

- The LED flashes yellow while connecting via Bluetooth and then flashes green once the connection is established.
- The connection between the Smart Probe and your mobile terminal device is established.

## 5.3. Transmitting readings

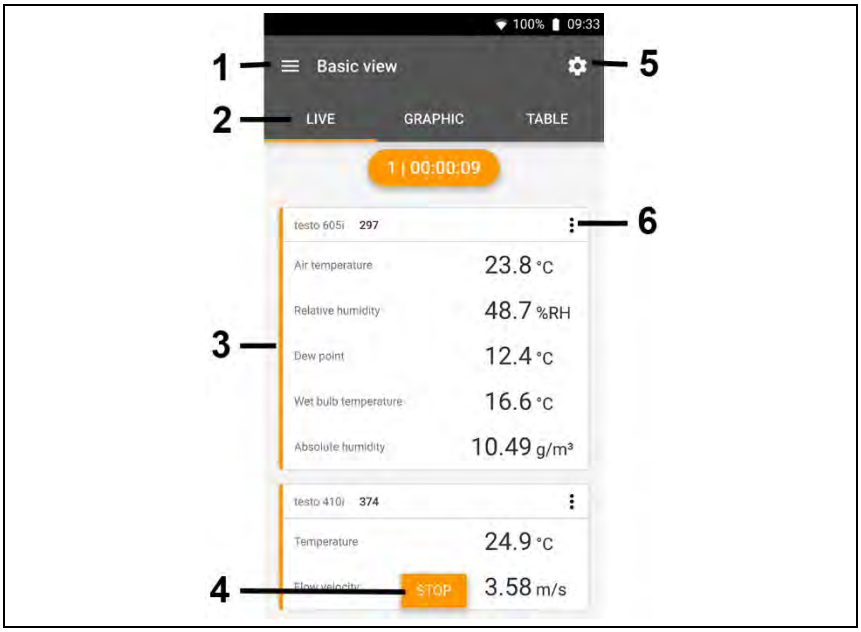
✓ The Smart Probe is switched on and connected to your mobile terminal device via Bluetooth.

- The current readings are automatically displayed in the App.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 6 Using the App

## 6.1. Overview of operating controls



1 Choice of applications.
2 Switch between the views (list, graphic diagram, table)
3 Display of connected Smart Probes including readings
4 Start/stop
5 Measurement configuration (the menu changes depending on the Smart Probe connected and the application selected)
6 Smart Probe configuration

## 6.2. App options

### 6.2.1. Set “Language”

1. Tap -> **Settings** -> **Language**.
- A selection list is displayed.
2. Tap the required language.
- The language has been changed.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

### 6.2.2. Display Tutorial

The **Tutorial** guides you through the first steps when operating the Testo SMART App.

1. Tap -> **Help & Information** -> **Tutorial**
- The **Tutorial** is displayed. In **Tutorial**, swipe to display the next page.
2. Tap X to close the **Tutorial**.

### 6.2.3. Display App Info

In App Info you can find the version number of the installed App.

1. Tap -> **Help & Information** -> **Instrument information**
- The App's version number is displayed, as well as the ID.

## 6.3. Application menus

### 6.3.1. Selecting the application menu

1. Press .
- A selection of menus for various applications is displayed.
2. Select the required application.
- The selection disappears and your selected application is displayed.

### 6.3.2. Setting favourites

1. Press .
- A selection of applications is displayed.
2. Press ☆ next to the application that you would like to designate as a favourite.
- The asterisk is displayed in orange ★.

### 6.3.3. Displaying information about an application

1. Press .
- A selection of applications is displayed.
2. Press ⓘ.
- The information about an application is displayed.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

## 6.4. Smart Probe settings

1. Press -> **Sensors**.
3. Select the Smart Probe to display the details you would like to see.
- A list with details about the Smart Probe appears in the **Information** tab.
4. You can activate the damping in the **Settings** tab.

If the readings fluctuate wildly, it is advisable to damp the readings.

✓ The probe is connected to the SMART App.

1 Click on .

▸ Main menu opens.

2 Click on **Sensors**.

▸ The Sensors menu opens.

3 Click on the required sensor.

▸ Information is displayed about the model, order number, serial number and firmware version.

4 Click on the **Settings** tab.

▸ The settings window opens.

5 Enable **Activate damping** using the slider.

6 Click on **Average of the measured values**.

▸ Window for Average of the measured values opens.

7 Enter a value between 2 and 20 seconds.

## 6.5. testo 115i/915i - Surface increment

Surface probes withdraw heat from the measured surface immediately after the initial contact. This makes the measurement result lower than

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

the true surface temperature without the probe (or the reverse if the surface is colder than the environment). This effect can be corrected by an increment in % of the reading.

✓ The probe is connected to the SMART App.

1 Click on ☰.

▸ Main menu opens.

2 Click on **Sensors**.

▸ The Sensors menu opens.

3 Click on the required sensor.

▸ Information is displayed about the model, order number, serial number and firmware version.

4 Click on the **Settings** tab.

▸ The settings window opens.

5 Click on **Use surface increment**.

6 Enable **Activate surface increment** using the slider.

## 6.6. List, graphic diagram and table view

The available readings can be displayed in different ways in the various views.

- List view
  Displays the readings transmitted by the Smart Probe in the form of a list. Readings from all connected Smart Probes are displayed here.
- Graphic diagram view
  The graphical progression of up to four different readings can be displayed. Tap on a reading above the diagram to select the readings to be displayed.
- Table view
  In the Table view, all readings are displayed in sequence according to date and time. The different readings from the individual Smart Probes can be selected by pressing ◄ ►.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

## 6.7. Settings view

1. Press ⋮ and select **Edit View**.
- An overview of parameters is displayed.
2. Deselect the check mark to hide a Smart Probe reading.
3. Press ▼ to select the unit for a reading.
4. Press **OK** to confirm your settings

## 6.8. Exporting readings

1. Press ☰ -> **Memory** -> **Select measurement**.

| | | |
|---|---|---|
| | Export |  |
| | Report | |
| | Delete | |
| | | |

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

### 6.8.1. Excel (CSV) Export

1. Press .
- A selection of export options appears.
2. Press **Start export**.
- A selection of sending/export options appears.
3. Select your required sending/export options.

### 6.8.2. PDF Export

1 Click on **Report**.

▸ A selection window is displayed.

2 If required, activate the **Create PDF with all readings** button.

3 Click on **Create**.

For measurements, please be aware that the option **Create PDF with all readings** is only possible up to 30 pages, due to the resulting file size and number of pages. In the testo DataControl software, however, PDF reports can be created for all measurements without any restrictions.

▸ A report containing all the information is created.

▸ A selection window is displayed. The report can be sent via e-mail or Bluetooth®.

4 Click on e-mail or Bluetooth®.

▸ The report will be sent.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 7 Maintaining the product

## 7.1. Maintaining Smart Probes

**Cleaning the instrument**

> Do not use any aggressive cleaning agents or solvents!
> Mild household cleaning agents or soap suds may be used.
> If the housing of the instrument is dirty, clean it with a damp cloth.

**Keeping connections clean**

> Keep connections clean and free of grease and other deposits, clean with a damp cloth as required.

**Ensuring measuring accuracy**

> Customer Service would be glad to further assist you if you so wish.
> Keep within the permissible measuring range!
> Calibrate instrument regularly (recommendation: once a year).

## 7.2. Smart Probes App

The Testo SMART App is kept updated via the Play Store for Android devices and the App Store for iOS devices. Please update the App as soon as a new update is available. We therefore recommend that you do not disable automatic notifications when new updates are available.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 8 Tips and assistance

## 8.1. Questions and answers

| Question | Answer |
|---|---|
| LED flashes red | • Batteries are almost spent.<br>• Change batteries. |
| The instrument switches itself off | Remaining battery capacity insufficient<br>> Change the batteries. |
| --- lights up instead of the measurement parameter display | • Outside the permissible measuring range.<br>> Keep within the permissible measuring range.<br>or<br>• Sensor is defective<br>> Contact your Service department. |
| The App cannot be found in the store | • No correct search terms were entered.<br>> Enter an unambiguous search term, e.g.: “testo Smart Probes” or use the link on the website.<br>or<br>• Your mobile terminal device does not meet the technical requirements (iOS 12.0 or later, Android 6.0 or later / Bluetooth 4.2 (Low Energy))<br>> Please check the technical data for your mobile terminal device |

## 8.2. Accessories and spare parts

| Designation | Item number |
|---|---|
| testo Smart Case (Refrigeration) for storing and transporting 2 × testo 115i and 2 × testo 549i, dimensions 250 × 180 × 70 mm | 0516 0240 |
| testo Smart Case (Heating) for storing and transporting testo 115i, testo 410i, testo 510i, testo 549i and testo 805i, dimensions 250 × 180 × 70 mm | 0516 0270 |
| testo Smart Case (VAC) for storing and transporting testo 405i, testo 410i, testo 510i, testo 605i testo 805i and testo 905i, dimensions 270 × 190 × 60 mm | 0516 0250 |
| testo Smart Case (temperature) for the storage and transportation of testo 915i and plug-in probes, dimensions 250 x 180 x 70 mm | 0516 0032 |

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

# 9 Technical data

## 9.1. Bluetooth module

The use of the wireless module is subject to the regulations and stipulations of the respective country of use, and the module may only be used in each case in countries for which a country certification has been granted.

The user and every owner undertake to adhere to these regulations and prerequisites for use, and acknowledge that the re-sale, export, import, etc. in particular in, to or from countries without wireless permits, is their responsibility.

## 9.2. General technical data

All accuracy specifications apply at a nominal temperature of 22 °C.

### 9.2.1. testo 905i

| Feature | Values |
|---|---|
| Measuring range | -50 to 150 °C / -58 to 302 °F |
| Accuracy ± 1 digit | ± 1 °C / ± 1.8 °F |
| Resolution | 0.1 °C / 0.1 °F |
| Measurement rate | 1/sec |
| Available units of measurement | °C, °F |
| Storage temperature | -20 °C to 60 °C / -4 to 140 °F |
| Operating temperature | -20 °C to +50 °C / -4 to 122 °F |

**IC Warnings**

This instrument complies with Part 15C of the FCC Rules and Industry Canada RSS-210 (revision 8). Commissioning is subject to the following two conditions:
(1) This instrument must not cause any harmful interference and
(2) this instrument must be able to cope with interference, even if this has undesirable effects on operation.

Cet appareil satisfait à la partie 15C des directives FCC et au standard Industrie Canada RSS-210 (révision 8). Sa mise en service est soumise aux deux conditions suivantes :
(1) cet appareil ne doit causer aucune interférence dangereuse et
(2) cet appareil doit supporter toute interférence, y compris des interférences qui provoquerait des opérations indésirables.

**FCC Warnings**

Information from the FCC (Federal Communications Commission)

**For your own safety**
Shielded cables should be used for a composite interface. This is to ensure continued protection against radio frequency interference.

**FCC warning statement**
This equipment has been tested and found to comply with the limits for a Class C digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

**Caution**
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Shielded interface cable must be used in order to comply with the emission limits.

**Warning**
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received,
including interference that may cause undesired operation.

**IC Warnings**

**RSS-Gen & RSS-247 statement:**
This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

**Caution: Radio Frequency Radiation Exposure**
This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets the IC radio frequency (RF) Exposure Guidelines. This equipment should be installed and operated keeping the radiator at least 20 cm or more away from person´s body in normal use position to ensure compliance with RF exposure requirement.
**Co-Location**:
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

**Attention : exposition au rayonnement de radiofréquences**
Cet équipement est conforme aux limites d'exposition aux radiofréquences IC fixées pour un environnement non contrôlé et aux Lignes directrices relatives à l'exposition aux radiofréquences (RF). Cet équipement doit être installé et utilisé en gardant le radiateur à une distance d'au moins 20 cm du corps humain en position normale d'utlisation pour garantir la conformité a d'exposition aux RF.

**Co-location**
Ce transmetteur ne peut pas être installé en colocation ou être utilisé avec une autre antenne ou transmetteur, quel qu'en soit le type.

IC Warnings

**CAN ICES-003(B)/NMB-003(B):**
This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe [B] est conforme à la norme NMB-003 du Canada.

**RSS-Gen & RSS-247 statement:**
This device complies with Industry Canada licence-exempt RSS standard(s).
Operation is subject to the following two conditions:
(1) this device may not cause interference, and
(2) this device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.
L'exploitation est autorisée aux deux conditions suivantes :
(1) l'appareil ne doit pas produire de brouillage, et
(2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

**Caution: Radio Frequency Radiation Exposure**
This equipment complies with IC radiation exposure limits set forth for an uncontrolled environment and meets the IC radio frequency (RF) Exposure Guidelines. This equipment should be installed and operated keeping the radiator at least 20 cm or more away from person´s body in normal use position to ensure compliance with RF exposure requirement.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

**Co-Location:**
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

**Attention : exposition au rayonnement de radiofréquences**
Cet équipement est conforme aux limites d'exposition aux radiofréquences IC fixées pour un environnement non contrôlé et aux Lignes directrices relatives à l'exposition aux radiofréquences (RF). Cet équipement doit être installé et utilisé en gardant le radiateur à une distance d'au moins 20 cm du corps humain en position normale d'utlisation pour garantir la conformité a d'exposition aux RF.

**Co-location**
Ce transmetteur ne peut pas être installé en colocation ou être utilisé avec une autre antenne ou transmetteur, quel qu'en soit le type.

FCC Warnings

Information from the FCC (Federal Communications Commission)

**For your own safety**
Shielded cables should be used for a composite interface. This is to ensure continued protection against radio frequency interference.

**FCC warning statement**
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
• Consult the dealer or an experienced radio/TV technician for help.

**Caution**
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. Shielded interface cable must be used in order to comply with the emission limits.

**Warning**
This device complies with Part 15 of the FCC Rules.
Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and
(2) this device must accept any interference received,
including interference that may cause undesired operation.

**Caution: Radio Frequency Radiation Exposure**
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines. This equipment should be installed and operated keeping the radiator at least 20 cm or more away from person´s body in normal use position to ensure compliance with RF exposure requirement.

sales@GlobalTestSupply.com www.Testo-Direct.com 1.888.610.7664

**Co-Location:**
This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.
